UI/UX - "OK-FOOD"

Team Project - 2021

"OK-Food" is a mobile-based online food-beverage ordering and delivery application. The "OK-Food" application collaborates with various restaurants and supports all forms of payment, both in cash and cashless.

This app was built as a solution for those who want to order food without having to leave the house during this pandemic time. In addition, the Ok-Food application focuses on small restaurants and provides them with a platform to help people who have just opened a small business during a pandemic.

In this project, I help design the User Interface. I also work as UX Designer by making the Design Thinking
